Attachments: Area 40 Formatted.xlsx

Hi Jackie - AR hired a service to provide all of the addresses within 1.5 miles of the center of Area 40. The list of Government officials provided by EPA was not current, so we added the addresses for the current City, County, State, and Federal officials for the City of Folsom. AR then added all the residents from the EPA provided Aerojet Area 40 Folsom Address 3 15 19.xls. Then added the addresses for the people on the HDR provided CAG list (trimmed where we knew the person was no longer in office). Then included anyone in attendance at the Area 40 public meeting in June. Finally, cross referenced with DTSC mailing list for Area 40.

The result is the attached file, which contains all addresses within 1.5 miles and all other unique addresses from the process above. This results in about 5,300 addresses. I believe the DTSC file was a 1500 foot radius around the entire AR site, so there are a lot of addresses outside of the 1.5mile radius that were also not included on the EPA or HDR supplied spreadsheets. If we exclude those DTSC addresses outside of the 1.5mile radius (listed in blue in the attached), the list is trimmed to just over 4,000 addresses. Still seems like a large number.

Please confirm that you are comfortable with this list and whether you want to include the addresses listed in blue. We are not set up to do a mass e-mail, so we can provide the mailing (which I will be preparing over the next month and sending to you for review) for you to send to the e-mail list(s).

Thanks, Chris
